Portfolio

Campo Grande, MS, Brazil

ABOUT

Full-stack Developer specializing in Java, Node.js, and reactive interfaces. Systems Analysis student dedicated to scalable architectures, Clean Code, and building software that adds real value.

ACADEMIC BACKGROUND

Undergraduate Degree in Computer Information Systems (CIS) — 2027
Estácio

Full-stack Web Development Program — 2023
Arnia - Programming School

Design UX — 2023
Certificação Google International

Computer Science (CS50) — Current
Harvard University - CS50x

LANGUAGES

Portuguese

English

COURSES & EVENTS

APIs and Microservices — 2026
TDC Floripa

Java and OOP — 2023
Udemy Brasil

Typescript — 2023
Udemy Brasil

PROFESSIONAL PROFILE

Mid-level Full-stack Developer with over 3 years of experience, specializing in the Java ecosystem (Spring Boot, Quarkus), React.js, and Vue.js. With a strong foundation in UX Design, I focus on architecting secure, scalable systems aligned with engineering best practices and data privacy compliance. Proven track record in building critical systems, such as regulatory document platforms, enforcing strict data governance (GDPR/LGPD). Committed to delivering clean, testable code and high-impact solutions that solve real business needs.

PROFESSIONAL EXPERIENCE

Full-stack Developer — 2025 - Current
Prothera, Santa Catarina

- Engineering and maintaining a secure, scalable, and data-privacy compliant regulatory document management system for workplace safety.
- Implementing high-availability architectures and sensitive data governance in full compliance with data protection regulations (LGPD/GDPR).
- Developing robust user interfaces and optimizing back-end integrations for the secure processing of critical information.
- Tech Stack: Java, Spring Boot, Vue.js, Quarkus, PostgreSQL, Jenkins, Cypress.

Full-stack Developer — 2023 - 2025
Izap Softworks, Minas Gerais

- Operated across the full software engineering lifecycle (development, maintenance, and deployment) for corporate systems, actively participating in architectural decisions.
- Created rich, responsive, and reactive user interfaces using React.js, Vue.js, and TypeScript.
- Structured scalable and secure RESTful APIs, applying data privacy compliance rules when handling relational and non-relational databases.
- Tech Stack: Java, Spring Boot, React.js, Vue.js, Quarkus.io, Oracle, SQL/NoSQL, JUnit.

Web Development Mentor & Instructor — 2023 - 2024
Arnia - Programming School, Minas Gerais

- Led technical mentorship for junior developers, focusing on code reviews, architecture, and the consolidation of best practices (Clean Code, TDD, and Design Patterns).
- Structured technical documentation for projects and educational materials, facilitating continuous learning and technical leveling for teams.
- Tech Stack: Node.js, React.js, Nest.js, Java, Relational Databases, Git.
